### **DETAILED ACTION**

Applicant's Amendment filed on 3-17-05 has been received and entered in the case. Claims 2-7, 9-15, 17-27 are pending wherein claim 23-27 are newly added. The rejections set forth in the previous Office Action for claims 2-7, 9-15 and 17-22 are withdrawn due to amendment of claims.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by the Fahrenbruch reference (U. S. Patent 6,282,253).

Fahrenbruch discloses in figure 2A an apparatus comprising a phase detector 54 receiving an input clock signal REFCLK; an adjustable delay circuit (48 & 52) coupled to an output of the phase detector (by means of 50) and generating a delay signal 26; and a selector 42 that selects the delay signal during a first stage of operation to cause the circuit to operate as a PLL, and wherein the selector selects the input clock signal as the selected signal during a second state of operation to cause the circuit to operate as a DLL as required by claim 23.

#### ***Allowable Subject Matter***

3. Claims 2-7, 9-15 and 17-22 are allowed.

Art Unit: 2816

4. Claims 24-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: Applicant has amended claims 2, 5, 9 and 17 to incorporate the allowable features indicated in the previous Office Action. Specifically, none of the prior art teaches or fairly suggests, among other things, the following limitations:

- A *divider* as required by claims 2, 17 and 24.
- A *logic gate* as required by claim 27.
- A *feedback loop* and the *edge-detector* circuit as required by claims 5 and 9.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2816

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
